To Whom It May Concern:

RE: Grease Interceptor Alternate Sizing Request/Justification

Environmental Compliance Specialists from the Industrial Waste Monitoring & Pretreatment (IWMP) Office review each Alternate Sizing Request submitted. The request will be approved, if the data submitted in the request indicates the proposed alternate size grease interceptor should be adequate to achieve compliance with the City of Lubbock Code of Ordinance.

IWMP does not recommend the installation of the alternate size grease interceptors, but based on the probability that the unit should be adequate to achieve compliance with the City of Lubbock Code of Ordinance the installation of the unit is allowed.

NOTE: If the primary reason for requesting an alternate size grease interceptor is inadequate space for a thousand gallon or larger unit, you are cautioned that space constraints will not now or in the future relieve the generator from City of Lubbock Code of Ordinance compliance.

The approval of the installation of an alternate size grease interceptor by IWMP in no way absolves the user from compliance with the City of Lubbock Code of Ordinance. Further, neither the City of Lubbock nor IWMP assume any responsibility if the alternate size grease interceptor does not perform as anticipated.

In accordance with the City of Lubbock Code of Ordinances Chapter 22, Article 22.04, Division 3, Section 083 (2), any water or waste which may contain more than two hundred fifty (250)mg/L by weight, of fat, oil or grease may not be introduced into to POTW.

The generator is cautioned that compliance with City of Lubbock Code of Ordinances Chapter 22, Article 22.04, Division 3, Section 083 (2) must be achieved on an ongoing basis. If the allowed alternate size grease interceptor does not, for whatever reason, provide the pretreatment necessary to comply with this requirement, it must be removed and replaced with a one thousand (1000) gallon or larger unit. The size of the replacement unit will be determined by IWMP based on review of data provided by the generator and entered on a sizing work sheet.

ACKNOWLEDGEMENT OF RECEIPT AND UNDERSTANDING

I _____, owner/proprietor of _____,
located at _____ Lubbock, TX. am in receipt of the Response to
Grease Interceptor Alternate Sizing Request/Justification letter from the City of Lubbock, Water
Utilities Department, Industrial Waste Monitoring and Pretreatment section.
